**QUAYLE**

1. The amendment filed April 22, 2003, has been entered-in-part. The amendment to the claims has been entered. The amendment to the specification has not been entered because the 26 pages of changes renders it difficult to consider and to arrange the papers for printing and would be an undue burden on the staff.

A substitute specification is required. A substitute specification incorporating the proposed changes to the specification is required pursuant to 37 CFR 1.125(a) because the number and nature of the amendments to the specification renders it difficult to consider and to arrange the papers for printing.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

Art Unit: 2851

2. This application is in condition for allowance except for the presence of claims 16-55 to an invention non-elected with traverse in Paper No. 7. Applicant is given TWO MONTHS from the date of this letter to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter and the requirement to file a substitute specification.

***Allowable Subject Matter***

3. Claims 1-15 are allowed. The reasons for the indicated allowability of the claims are as follows:

The prior art of record does not disclose or suggest a measurement device including a measurement surface positioned at a plane conjugate to a pupil plane of the projection optical system or a plane spaced apart from the mask enough to separately detect respective rays emerging from plural points of the pupil plane and passing through the transmission portion in combination with the other claims recited in independent claim 1.

Art Unit: 2851

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
